What's New In?

Screenshots provided by the vendor. Description: JPS File

Manager is an open source application for Windows, created to make managing files and folders more easy and efficient. The goal is to eliminate as much typing and clicking as possible when it comes to managing files and folders. JPS File Manager currently has over 8000 registered users, and it was downloaded over 35.000 times over the last year, which indicates that people really need a tool like this to

help them in file management. If you are looking for a simple and efficient file manager that works just like a standard Windows Explorer, then you should take a look at JPS File Manager. JPS File Manager Features: * Shows the content of sub-folders and sub-files (Sub-Dirs, Sub-Files, Compressed Dirs and Files) * Shows icon previews of images and documents * Opens and saves files with

different compression settings * Shows extra information like the file permissions, the last modified and created dates, and the size of a file * Shortcut to desktop of a folder * Duplicate file detection * Time Management * Date/Time Management * Displays size of files and folders * Displays hidden files * Easy icon grouping * Preview all files including binary files * Drag and drop support * Search * Simple and

intuitive interface * Speed, a system wide startup item for JPS File Manager Description: BitDefender Personal Firewall is an all-in-one, anti-virus, anti-spyware and anti-spam solution for PCs and mobile devices. It protects users against virus, spyware, phishing and spam attacks, protects against botnet attacks, and helps to maintain a safe computer and mobile device. BitDefender Personal Firewall is a clean and fast

anti-malware solution that is easy to use. It does not require any configuration and is free for home use. It runs as a service, so it is always running in the background, so users no longer have to worry about accidentally closing the application while they are working. The application also comes with a free lifetime subscription to BitDefender Anti-Theft Premium, which provides additional protection against online thieves and

helps to recover lost or stolen laptops, smartphones or tablets. BitDefender Personal Firewall: * Freely available for home use * Easy to use * Thorough protection against viruses, spyware, and malware * Detects and blocks malicious websites and URLs * Powerful desktop and mobile agent that blocks suspicious mobile activities * Quick scans in a fraction of a second * Built-in firewall that prevents unauthorized

applications, instant messages and popup windows from launching * Updated signatures for better protection against virus, spyware and malware * Safe browsing mode for Microsoft Edge * Supports BitDefender Anti-Theft Premium for free Description:
