Adobe made changes to the File Download dialog in CS6 to improve accessibility. While it's a little inconsistent, you can now press cmd-I to show a keyboard interface in the dialog to browse your files from the keyboard. As with the older copy-paste function, the method only works for text though. If you've ever copied content from a Clipboard to your computer, you might feel a bit lost without access to the default I key. Hopefully, this change to the File Download dialog will make it a little easier to navigate for users who use the keyboard as their primary input method. **Ta-da!** Photoshop updates its 20-year-old Retouch feature with a slew of new feature.
